SUMMARY

Aspiring Software Engineer with hands-on experience in full-stack and backend development using Java, Spring Boot, React.js, SQL, and RESTful APIs. Skilled in building scalable, secure, and production-oriented applications with expertise in JWT authentication, role-based access control (RBAC), database management, and frontend-backend integration. Strong foundation in Data Structures & Algorithms, problem-solving, CI/CD workflows, Docker, and modern software development practices, with a passion for developing efficient and user-focused solutions.

TECHNICAL SKILLS

Languages	Java, SQL
Backend	Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST API Design, JWT, BCrypt, RBAC, MVC
Databases	PostgreSQL, MySQL,
Frontend	React.js, React Hooks, Axios, Tailwind CSS, HTML5, CSS3
DevOps & Tools	Docker, CI/CD, Git, GitHub, Maven, Postman, Swagger/OpenAPI, Vercel

WORK EXPERIENCE

Dynamic Tangent

Feb 2025 – Dec 2025

Software Developer Intern | Remote

- Built and shipped production React.js frontend screens using component-based architecture and React Hooks for a live web application used by real users.
- Analyzed 1,500+ job descriptions to benchmark and improve a Resume Generator tool's output quality, delivering measurable quality improvements under strict deadlines.

PROJECTS

Finance Data Processing & Access Control API

2026

Developed a production-deployed, scalable finance management backend system leveraging secure RESTful microservice architecture, role-based access control (RBAC), and real-time analytics dashboards to deliver high-performance financial record management with enterprise-grade authentication and data security.

Tech Stack: Java, Spring Boot, Spring Security, PostgreSQL, Hibernate/JPA, Docker, SpringDoc OpenAPI, Maven.

Sweet Shop Management System

2025

Developed a scalable full-stack Sweet Shop Management System featuring secure JWT-based authentication, role-based access control (RBAC), and responsive user/admin dashboards to optimize product management, inventory tracking, and customer engagement through robust RESTful API architecture and seamless frontend-backend integration.

Tech Stack: Java, Spring Boot, Spring Security, MySQL, React.js, Axios, GitHub

School ERP Management System

2025

Developed a scalable and enterprise-grade School ERP Management System leveraging secure JWT-based authentication, role-based access control (RBAC), and robust RESTful microservice architecture to streamline academic operations, user management, and seamless frontend-backend integration through Docker-based containerization and CI/CD-driven deployment workflows.

Tech Stack: Java, Spring Boot, Spring Security, PostgreSQL, React.js, Docker, CI/CD, Postman

EDUCATION

Bachelor of Technology in Information Technology

2022 – 2026

B V Raju Institute of Technology

CGPA: 8.27

Relevant Coursework: Data Structures & Algorithms, OOP, Databases, System Design, Agile Methodologies

CERTIFICATIONS & ACHIEVEMENTS

- Smart Coder** in Data Structures & Algorithms – SmartInterviews; earned Bronze Badge for consistent algorithmic problem-solving.
- Spring Boot** Certification – Udemy (covers Spring Security, JPA, REST API design, and microservices fundamentals).
- Delivered **3 production-ready backend systems** (Finance API, School ERP, Sweet Shop) each featuring JWT authentication and RBAC – deployed or demo-ready.
- Git For Beginners** Certification – Udemy (covers Git fundamentals, version control workflows, branching, merging, repository management, and collaborative development using GitHub).
